

Environmental Specialist

Classification:

This is a Full Time permanent position, located in Juneau, Alaska.

Admiralty Environmental is looking for a dynamic person to join the firm as an Environmental Specialist in our Juneau, Alaska office. This position will be responsible for managing a variety of projects that include environmental sampling, laboratory analysis, and project management for industrial clients in the cruise ship, mining, and wastewater treatment industries. This is an excellent opportunity for an environmental professional to work with a well-established and technically diverse firm on challenging environmental water quality issues.

Key Duties:

- Planning and managing field sampling projects in coordination with the general manager (writing and preparation of sampling plans; coordination with subcontractors and regulators; and environmental sampling of surface water and wastewater);
- Leading field teams consisting of 1 to 3 members, emphasizing proper environmental sampling procedures and health and safety;
- Operating a remote mobile laboratory, for two- to three- week periods, in both domestic and international settings (current work travel is dependent on COVID-19 travel mandates);
- Analyzing water samples and interpreting environmental chemistry data using laboratory instrumentation;
- Assisting with viral transport medium (VTM) production;
- Database management;
- Writing and preparation of reports and other technical documents;
- Interaction with clients and regulatory agencies (in person contact currently limited due to COVID-19 protocols);
- Assisting in developing presentations; and
- General office tasks and supervision.

Headquartered in Juneau, Alaska, Admiralty Environmental is a leader in water sampling, analysis, and project management for public and private clients. Our employees help Admiralty Environmental deliver innovative, practical, and technically sound results and solutions — helping clients meet increasingly stringent environmental regulations and manage their systems to operate in an environmentally sound manner. To fulfill this mission, Admiralty Environmental is seeking an environmental professional who has a passion for working on challenging projects that will grow their professional skills.

Job Requirements

Qualified candidate will have the minimum of:

- Bachelor's degree in Geology, Biology, Chemistry, Environmental Sciences, or Engineering;
- 1 to 3 years of relevant experience;
- Strong writing, communication, and computer skills;
- Ability to work in the field in industrial settings; and
- Proven ability to work independently with some supervision, as well as proven ability to effectively work in and/or lead larger project teams. Frequent overnight travel will be required during peak cruise ship season. Must have own transportation.
- COVID-19 vaccination required for employment consideration.
